Promotion of Energy Efficiency and Renewable Sources of Energy in the Domestic Sector

Declaration by the applicant

I, the undersigned applicant, hereby confirm that to the best of my knowledge, the information given in this application and any attached information is true and correct, and that it represents accurately the data being requested. I undertake to inform the Malta Resources Authority of any changes in the information contained in this application, and I authorise the Malta Resources Authority to carry out the necessary investigations in order to verify this information. I understand that the conditions for acceptance of this application may be changed and/or altered by the Malta Resources Authority from time to time. I also undertake to give any other information that may be requested from time to time by the Authority. I understand that the Authority shall not be precluded from taking action in the event that the installation is not carried out in accordance with the content of this application or does not conform with the requirements of Government Notice XXX of 2009 or of any other legislation. I confirm that the technology as specified in the grant offer (with the MRA reference number detailed above) has been installed and is operational at the site specified in the grant offer. This claim is final.

Completion Certificate for Photovoltaic Panels

This should be completed in full and left with the customer. It will need to be attached to the aid scheme application form Part III and must be submitted to Malta Resources Authority within the time period indicated on the grant offer letter.

TEST RESULTS

PV Module specification at standard Testing Conditions

Manufacturer & Model of modules	
Rated Power (Pmax) per module	Watts
Open Circuit Voltage (Voc) per module	VDC
Short Circuit Current (Isc) per module	Amps DC
Maximum Voltage (Vpmax) per module	VDC
Maximum current (Ipmx)	Amps DC

Declaration (to be completed by Engineer)

I confirm that the above system incorporating PV panels and inverters has been installed and commissioned at the above address. The system design is in line with current best practice and has been grid connected according to Enemalta requirements and with the required aid scheme regulations. The system is installed in such a manner as to comply with legal requirements.

The system is operating correctly. I have explained the system to the customer and handed over all the instruction documentation including warranty details.

Name and Surname of Engineer _____

Warrant No: _____

Signature _____

Notes

- In cases where the supplier does not conform to any provisions set out in the scheme, the supplier/installer shall be obliged to either change the equipment to bring the installations within the provisions of the scheme or pay the grant to the end consumer. This does not exclude the possibility that the end consumer may take legal action against the retailer to provide him with equipment as originally requested.
